...stunning photographs... -- Science News

Mark O'Shea is Curator of the Reptile Collection at the West Midlands Safari Park, England. He has participated in scientific expeditions to many parts of the world, and since 1986 has been making films for television, including programs for the Discovery Channel and O'Shea's Big Adventure, shown on Animal Planet. Tim Halliday is one of the world's foremost authorities on amphibians. He teaches at the UK's Open University and is International Director of the Declining Amphibians Populations Task Force. --This text refers to an out of print or unavailable edition of this title.

My bought this for my 5 year old grandson and he's in love with it! He loves animals and loves learning about them. He get his book for bedtime and mom reads all about the animals to him, He doesn't want to hear a story ,he wants to learn about the animals and he remembers each one of

them. The book is not flimsily either. Books aren't cheap anymore so I try to pick one that is made well. This one is very strong and should last him years.

While it appears like a field guide, and arguably it is, if you live in North America, this is not a great book. It misses a lot. It's basically a book that gives a sample of reptiles around the world but is useless for identification in any one location. So, if you are looking to learn a lot about different reptiles around the world, then this is a good book. If you are looking for a field guide to North America pass. It's too bad, because the pictures and descriptions are great, but they are just incomplete for each region. I would love one of these focused just on North America.

Just what Grandson had asked for. He loves it.

Bought for my 6 year old nephew.. He loved it! Tons of great pictures.

great pocket guide

This book helped my Grandson understand Reptiles and Amphibians. Some are a problem but some are not. He has many fears as his Mother is scared to death of creatures. Books like this give a comfortable way to understand what is bad and what is good in the animal kingdom.

Just what my nephew wanted

Fantastic guide to complex and interesting world of Reptiles and Amphibians. Great photos and descriptions. Lots of good facts. Highly recommend as a guide.
