Customer Reviews

"This is an outstanding reference. It offers a wealth of information on typical medical complaints in infants and children. I recommend this book to all who provide pediatric telephone triage."

Steadman McPeters, DNP, CPNP-AC, RNFA (UAB School of Nursing) Doody's Book Review

Barton D. Schmitt, MD, FAAP, is a professor of pediatrics at the University of Colorado School of Medicine and medical director of the After-Hours Call Center at The Children's Hospital in Â Colorado.Ã Â

Updated protocols with supporting rationale included in this edition. The addition of 16 new protocols are extremely useful and address concerns not included in the 14th edition. The tabbed format makes for easy navigation during telehealth triage. Simply put, I could not perform high quality phone triage in our busy pediatric practice without it.

This is an awesome book to provide Telephone triage services. Added more chapters, more OTC medication references/dosages. I put tabs on the specific protocols I use the most, and I am able to flip to them quickly when I need them.

as described great product

I am a school nurse at a junior high in suburban Texas. A school nurse clinic is a bit like a mini ER, you never know what is going to walk in the door. This reference has been INVALUABLE numerous times already. Especially since I am the only medical professional in the building. Highly recommended!

Have given this book many times as a gift to first time mothers> Full of information that is easily understood and useful.

Gold standard as always

Great reference!

Great product
