Customer Reviews

"Two things I especially like about the book are that it is realistic and that I couldn't find any really bad advice....I feel Cobb tells readers what they should hear which is a credit to him." -- Charlie Palmer, Author of THE PREPPER NEXT DOOR "Prepper's Home Defense has earned a place on my bookshelf by giving me the information I needed to go home and put in place some security procedures and equipment that made my home more secure the day I read the book." -- Stephanie Dayle, American Preppers Network "I like this book because it simply addresses security issues which are of concern in preparedness circles, and also because even after twenty five years of prepping, it gave me some additional perspectives especially in the areas of structure hardening, safe rooms, and communications.... Jim Cobb gets my wholehearted recommendation for this book." -- RationalPreparedness.blogspot.com "Jim does a great job in laying out the options and

helping the reader wade through all of the available weapons choices. Â I especially liked his improvised 'hand-spike' fashioned from a hub cap removal tool....Â If you like reading about prepping - especially defense - you will like this book. Â It's a great compilation of security strategies to help protect your 'fort' and 'family'...." -- Creek Stewart, Willow Haven Outdoor"Starting from with basic concepts, he has put together a solid work for evaluating your home from a defensibility perspective and explains what items are necessary to have for both survival and defense." -- ReadingRoomBookReviews.com

Jim Cobb is a disaster readiness expert and owner of DisasterPrepConsultants.com. He has been a prepper for most of his life and has worked almost twenty years in the security management and investigation fields. Jim formerly wrote The Frugal Prepper column in Survivalist Magazine and currently writes a daily blog for Survival-Gear.com. Jim's primary home online is found at SurvivalWeekly.com. He lives and works in the Upper Midwest, sequestered in a fortified bunker with his lovely wife and their three adolescent weapons of mass destruction.

Good book to look into when preparing to defend your home during a disaster, exploring dynamics and roles ,and sets the ground work for alot things you need to do. Regardless if your in a 200 acre farm or a 200 sqUare foot apartment.

Fantastic book. It's a quick read with a lot of good insite. The author brought up a few points that I hadn't considered even though I consider myself an advanced prepper. Read the whole book in 3 sittings. It's worth the money. Read it and pass it on to a friend.

The cliché of offering 'Something for everyone' is, in the case of Prepper's Home Defense, an apt description.A good portion of the book deals with steps that are best implemented in a group environment; a group of preppers that are physically close together and can build a support team. If you are fortunate to be in such a situation, that is fantastic and these parts of the book can be used to implement security. I personally am not in such a situation, but I still learned a lot of good ideas to consider in those parts of the book.Other parts deal with steps a couple or individual can take, and those more isolated can gain much from those discussions.In a country or area with strict weapon controls? There are ideas presented to still secure and protect yourself. Have you heard the '3 is 2 and 2 is 1' adage? Meaning you should not count on just one solution to any need, you need to have plan 'B' and then plan 'C'. This book gives lots of smart alternative ideas you can use not just

as primary solutions, but as backup plans as well. The author also takes time to warn about remaining inside the boundaries of the laws that effect you, at least as long as there remains a Rule Of Law. I appreciate this, as so often inside of the prepper movement we see ideas that are not only dangerous, but likely to put you on the wrong side of the law. Topics that could get you in trouble, either physically or legally, are flagged appropriately through out the book. The book contains lots of general excellent content, as I said, something for everyone. As such, it would make an excellent first read into this area of prepping. Probably the best first read I have seen, and I've looked at and read a lot of books. It would make a great book for a prepper group to use as a book study. When viewed as an introductory read into the topic of prepper security and protection, I give it its 5 stars. But realize that it is not a detailed reference work, with step by step diagrams and lengthy chapters on each topic. The book covers LOTS of topics, and most of them could warrant a book of their own. This book gets you thinking, and gives some concrete ideas that can be implemented. Whether you have a fully implemented and staffed fortress, or you have a rusty pen knife, this book belongs on your bookshelf, AFTER you have worn the pages and covered it in highlighter.

As a soldier I found the information in this book very informative. My husband mentors kids and has used this book as a teaching tool (we have ordered 4).

I have not read this yet, but skimming through, it's amazing the things you DON'T think about when prepping. From perimeter defense to firearms to excursion advice, this book has a lot of info in its 221 pages. I'll update if I can, once I read it.

This book presents a mostly high-level overview of things to consider for home/retreat defense. If one has done any moderate reading in this area, this book is probably redundant. That being said, the book does present things to consider in each topic that a person may have not considered--I learned a few new aspects to consider. If one only gets one good idea from the book, it is worth the read.

The book was well written, and informative. I just recently via a suggestion in the book, covered our porch windows and door with weed netting. It was a great tip, and not only does it cut down on the early morning sun, but now no one can see directly into my house via the front screen door. I have an enclosed porch, and a screen door which lines up with my front door. being we heat the porch my fiance and I generally sit on the porch which means the front door is open. If we are not on the

porch and anyone "casing" the house will not be able to see inside unless they plant their face on the window to look in, and even at that it would be very restrictive. Overall a great read, and I would recommend this to every, especially the beginners, but I feel it could offer some tips to the experienced as well.

Really basic info any simple Internet search would provide. If you know absolutely nothing about security, I suppose it's a place to start.
