# National Geographic Readers: Sharks! (Science Reader Level 2)

## Synopsis

He's quick. He's silent. He has five rows of deadly teeth. Chomp! Meet the shark—the fish who ruled the deep before dinosaurs roamed the Earth! This fish has soft cartilage so he can glide, twist, and turn before his prey can say "gulp!" He can smell a single drop of blood in 25 million drops of ocean. He can feel electricity given off by his prey. He will lose and replace more than 10,000 teeth in his lifetime. Cool photos bring kids into the shark's world. Fun facts go deep into the shark's scary science.

## Book Information

Lexile Measure: 0520 (What's this?)

Paperback: 32 pages

Publisher: National Geographic Children's Books; English Language edition (July 8, 2008)

Grade Level: Kindergarten - 3

## Customer Reviews

ANNE SCHREIBER is a graduate in Science Education from Cornell University and began her career as an elementary school teacher. She wrote the science content for the Magic School Bus television series. She has written more than a dozen books for young children. She lives in Brooklyn, NY.

My 2 year old LOVES this entire series of Nat. Geo Readers... I have purchased about 25 different titles, "pre-readers" as well as Level 1 & 2 readers. She loves them all & will ask for certain ones. The "pre-readers" level books are extremely simple & great because she memorizes the words & can "read" it herself. We love the more advanced ones too, because there is more information to

talk about. I have learned quite a few facts, myself!) What a great series. The price is reasonable & pictures are great. These are really getting her interested in nature, animals & science... I will continue to buy these as they are released, for our collection!

My 8-year-old great-nephew, who doesn't really care for reading, is in love with this book and carries it around with him everywhere. I can't think of a higher review than that. It's well written -- age appropriate but not patronizing -- and the photos are great quality. I plan on ordering more in the National Geographic Readers series.

Wonderful nonfiction book about sharks. Full on fun facts about sharks. My son enjoyed the read, and so did I. It is interspersed with jokes and colorful pictures and this makes the book more enjoyable! Some of them could've left out the part about, being happy that a certain shark was extinct. My child was a bit offended by that. Other than that, the ending does encourage coexistence with this often feared and misunderstood sea creature.

I purchased this book for an 8 year old who was given sharks teeth found and collected off Manasota Key Florida. He loved being able to look up information on the type of teeth he now has in his possession. He thought it was pretty cool! This book gives all sorts of explanations and easy to understand information about sharks body's and teeth. Easy to understand pictures with explanations. I scored giving this book as a gift.

We were very happy with this book. Purchased it as one of three books my 3rd grader needed as a source for a school project. This book was easy enough that he could read & sort through the information himself, yet it still provided great facts & a wealth of knowledge for his report. Plus my younger 2 boys enjoyed it bc of the pictures.

My son likes the content of this book. Easy to understand for a 5 year old. He has other national geographic books and this one became his new favorite.

My son claims to love sharks, but felt parts of this were a little creepy. Maybe we shouldn't have read it on vacation at the beach... It is easy to follow, got nice bits of information, and vivid pictures.

Using as a mentor text in my classroom for Lucy Calkins Units of study.
