Architecture Words 2: Anti-Object

Synopsis

Kengo Kuma is one of Japan's most prominent architects, with a growing international practice. His projects have been widely praised for their beauty, clarity and attention to detail. One of the key issues in the architecture of Kengo Kuma is the way it responds to its setting. Unlike many important figures of Western modernism, who have promoted the idea of the isolated architectural object, his work attempts to have a tight fit with its immediate context. In *Anti-Object* Kuma traces in philosophical terms his approach to architecture, revealing influences from Kant and Bruno Taut to the Japanese tradition of *weaker* buildings characterised by their use of natural light and natural materials. *Architecture Words* is a series of texts and important essays on architecture written by architects, critics and scholars. Like many aspects of everyday life, contemporary architectural culture is dominated by an endless production and consumption of images, graphics and information. Rather than mirror this larger force, this series of small books seeks to deflect it by means of direct language, concise editing and beautiful, legible graphic design. Each volume in the series offers the reader texts that distil important larger issues and problems, and communicate architectural ideas; not only the ideas contained within each volume, but also the enduring power of written ideas more generally to challenge and change the way all architects think.

In a world flowing with images, Kuma argued that we need to question how our way of seeing through images have changed the nature of architecture.

It's a great read. I'm currently in grad school and it helps a lot when thinking about the design of the buildings and the idea of space is really well explained. A Must read for new architects.

I like the book a lot. The only problem I found is the images of the kindle version are so small on my android phone. And I couldn't find a zoom option for images
