very good, tons of good information

Great book bright pages!

My son liked it. He is in the 4th grade so it may have been a little easy for him to read. I want him to improve his reading skills. Still it is a good book to any child that wants to learn more about space.

My granddaughter received this book for Christmas and she has already started reading Level 3. She is enjoying it. It has beautiful illustrations and the text is clear and very interesting.

My 7 year old loves this book a great deal. Keeps wanting to read it.

great gift for kids !

Nice easy read with good info, great introduction to non fiction for kids.
