Irwin & Rippe's Manual Of Intensive Care Medicine

Synopsis

Irwin & Rippe's Manual of Intensive Care Medicine has established itself as an invaluable reference for students, interns, residents, fellows, nurse practitioners and physician assistants, nurses, and respiratory care practitioners working in the critical care medicine environment. Known for its reader-friendly outline format and compact portable size, this handy manual builds upon its tradition of excellence in its Sixth Edition. Available both in print and electronic formats, the Sixth Edition parallels the text, Irwin & Rippe's Intensive Care Medicine, Seventh Edition, and features fully updated and revised content with a focus on patient safety. Key Features: Fully revised content addresses recent developments, including the larger role for ultrasound, in critical care medicine. Annotated references are provided at the close of each chapter to guide the interested reader through key articles in the relevant literature. Video clips have been added where appropriate to reinforce key points and findings. Logical organization begins with an extensive section on Procedures and Techniques, followed by 15 sections covering organ system problems as well as palliative care, legal and ethical issues, and transplantation. Thorough coverage of pharmacology, poisonings, and overdoses presented in a tabular format. New section editors share a wealth of experience and expertise targeted to broaden readers' skills.

Great buy

Excellent reference book

Thanks

Originally I had hoped to use the Washington manual for ICU but hated the format. I wanted something more like the Washington Manual for hospital medicine, but focused on critical care. This is that book. Most chapters are well written, with great summaries of important details. Not as many algorithms and flow charts as the Washington version, but that's not necessarily a bad thing. It's a bit too thick to carry around regularly - I would have loved an electronic version for inkling. Still a great book for an aspiring intensivist like myself.
