Whoo hee - scored big with grandkids on their birthdays!

I purchased this book to find activities to bridge the gap between home and school, as well as virtual and physical worlds. I am a teacher of fifth grade students and have been using Minecraft in my classroom for over a year. This book is such a valuable resource for any teacher or parent looking to connect with their students or children. I really love this book and highly recommend it for any parent or educator looking to expand their use of Minecraft or simply connecting with kids.

This book has some very creative ideas. The activities for the kids are great. I love that it gives my kids a purposeful task to complete in the game of mine raft.

Nine year old grandson loved this book. He was so excited.

Bought this for my nephew and he loved it. Delivery was fast, too.

Great buy!

My kids love minecraft, and I've come to appreciate its intricacy and educational value thanks to John and Chris. This book is great, and being able to use this program as a tool for growth with kids is wonderful.

A great way to incorporate the popular game with family events. Connecting the real world with the virtual.
