20 Ways To Draw A Star And 44 Other Far-Out Wonders From The Sky And Galaxy: A Sketchbook For Artists, Designers, And Doodlers

Synopsis

Let your imagination shine with *20 Ways to Draw a Star and 44 Other Far-Out Wonders from the Sky and Galaxy*. Beautifully illustrated, this inspirational sketchbook will help you learn how to draw anything in the sky and beyond. From satellites, space ships, and asteroids, to crystals, raindrops, clouds, suns and moons, *20 Ways to Draw a Star* is perfect for illustrators, cartoonists, doodlers, and anyone who loves to sketch. This is not a step-by-step technique book--rather, the extra-terrestrial objects in this volume--astronauts, comets, craters, robots, and more--are simplified, modernized, and reduced to the most basic elements, showing you how simple abstract shapes and forms meld to create the building blocks of any item that you want to draw. Each of the 20 interpretations provides a different, interesting approach to drawing a single item, providing loads of inspiration for your own drawing. Presented in Salli S. Swindell's and Nate Padavick's uniquely creative style, this engaging and motivational practice book provides a new take on the world of sketching, doodling, and designing. Get out your favorite drawing tool, and remember, there are not just 20 Ways to Draw a Star! In this volume: geodes, crystals, raindrops, clouds, suns, moons, shooting stars, constellations, storms, lightning bolts, flying saucers, planets, solar systems, moon boots, aliens, craters, asteroids, space clothes, helmets, space gear, ray guns, comets, tornados, space bugs, astronauts, space vehicles, spaceships, milky ways, space sparkles, rainbows, space hair styles, swirls, satellites, telescopes, jets, molecules, space monsters, space flowers, space trees, big bangs, space houses, space pets, robots, space foods

Customer Reviews

Salli S. Swindell is part of a brother/sister design and illustration team, along with Nate Padavick, known as Studio SSS. They are also the founders of They Draw & Cook and They Draw & Travel; the largest online collections of illustrated recipes and maps from artists around the world. Since Salli lives in Hudson, OH and Nate in Boston, MA they check in with each other daily via e-mail and video chats. About 30% of the conversation is business and the other 70% is laughing and praising each other's work. That's what studio partners and siblings are for, right?! Salli likes to hike, tend to her 4 cats and draw food. They both like to drink good coffee and talk about all of the fabulously creative and talented artists who submit work to their

My junior high students love using these books to draw, doodle, and create with. I don't let them draw in the books, though the books are designed that way, but they love the ideas, and the chance to work on their skills.

I love all these books. This had some unexpected pages like outer space pets and plants. It met my expectations.

good, fast service

I have a few of the 20 Ways to Draw a ... series and this is my least favorite. Many of the doodles are very similar not just on the same topic page but from section to section. Then there are the topics that don't make sense or fit the theme of the book. I would have given it one star, but there are some cute doodles and some items that are clever, but I wouldn't recommend this book to you unless you are completing your set of the series. The other titles I have from this set are great and I

am sure there will be future books in the series I will enjoy.

Another cute book in this series.

This is a fun little book. Okay little may not be the right word as it is 96 pages long of intergalactic doodles. It measures 8.5x10 inches in size. The cover is thick and sturdy. I can see this holding up to a long time of use. This would be a cute book for amateur artist or someone wanting to unwind with playful doodles. I received this book for free in exchange for my honest review.
