Really love the book. Unfortunately, stickers were not included in my copy. Fortunately, it is so simple to learn which keys are what, my 8 yo has no problem following along. He was able to play songs the first day using his new keyboard and book.

just fright for the Earlie beginner.... not frustrating.... very happy, good buy

Easy to use, well planned piano learning book! A youth could self teach with this book, very helpful exercises presented in easy to understand examples! Fun known learning songs with footnote helps when needed building upon skills as the book progresses. Also included are key decals to make learning even easier . . . this book is a keeper and will help this Grandma learn while helping an interested grandson too!

Grandsons love it

This would be a great book for a kid taking lessons or to share with a parent who knows how to read music. But with us it is the blind leading the blind. I had my share of piano lessons as a kid but I'm struggling to understand the teaching method here.

Bought this for my little sister for Christmas and she loves learning all the songs included in the book. She is 10 years old and does not have any piano experience, but had a lot of interest in learning. This is a great start for kids who want to learn piano. (And a test of commitment before starting piano lessons if the parent isn't sure if their child is really serious about starting lessons. ;)

Great book for beginners, but they could have a wider song choice.

This has helped my granddaughter so I will say it is great!
