Making Design Stamps For Jewelry

Synopsis

Common jewelry tools and techniques can be used to make customized stamping and texturing tools that add visual interest to jewelry designs. Many jewelers are reluctant to work with steel, but there are few differences as compared to copper or silver. Once learned, unique stamps or texturing tools can be created for a special application, to accent your work in a unique way, or to brand your pieces with a stamp that others cannot purchase. "Making Design Stamps For Jewelry" presents the step-by-step process of selecting best steels, carving the design, hardening the steel, and tempering the completed stamp to ensure a long service life. It describes the tools to use, gives detailed examples for making several design stamps, includes sources for purchasing tool steel, describes useful shop equipment, and offers tips for saving time and achieving better quality.

Customer Reviews

Very informative and easy to follow, instructions for making steel stamps. From step one one what metals are best, where to purchase, how to "carve" your design, how to harden and finally temper your metal. This was exactly what I needed. Thank you.

Looking forward to using this book. Bought as a gift for my daughter who love design stamps and really wants to learn to make her own.

This is a great book to learn how to make your own stamping tools. Easy to follow instructions. Highly recommended.

Great little book for creating your own stamps. Good tips and explanations. Recommend.

I've started making metal stamps and this is a great resource.

a good book, lots of info on how and what to use to make metal stamps, plus tech info and definitions.

A lot of good information in a small book.

This is a great book that helped me to make my own stamps for silversmithing
