# Neonatology For Primary Care

## Synopsis

Designed as an action-oriented working tool, this new comprehensive reference from the American Academy of Pediatrics provides the essential core of practical knowledge that pediatricians, family practitioners, residents, and other pediatric health care professionals need to deliver optimal care to all neonates. The content covers the continuum of care from delivery to hospitalization and discharge for the healthy term and late preterm infant, as well as the infant who requires specialized neonatal intensive care. This reference contains evidence-based practice recommendations and provides tools to support the in-hospital and after-hospital community pediatric care for healthy and at-risk infants. Thirty-six chapters cover step-by-step recommendations on what to do, when to admit, and when to refer. Recommendations and lists detail references within each chapter.

Perinatal preventive care  
Routine care issues  
Assessment and physical examination of the newborn  
Neonatal medical conditions  
Caring for the high-risk infant  
Neonatal outcomes  
Medical-legal considerations  
Support for families during perinatal illness and death

An ideal resource for pediatricians, family physicians, medical students, residents, residency program directors, physician assistants, pediatric nurse practitioners, and nurses.

## Book Information

Paperback: 900 pages

Publisher: American Academy of Pediatrics; 1 edition (October 1, 2014)

Language: English

ISBN-10: 1581108176

ISBN-13: 978-1581108170

Product Dimensions: 6 x 1.5 x 8.9 inches

## Customer Reviews

5 Star Doody's Book Review! This is a unique book that will quickly find an important place among the standard references for primary care pediatric providers. It is comprehensive and well

written, covering much of what primary care providers encounter that is absent from the standard intensive care textbooks of neonatology. There is no comparable books in this area -- this fills an important need. This book from the American Academy of Pediatrics is directed at primary care physicians or nurse practitioners who care for newborns with common problems. The book differs from standard neonatal books in that it does not emphasize intensive care or the care of extremely premature infants, but rather a practical approach to common problems seen in the first month of life. The purpose is to provide "an action-oriented working tool" for primary care providers on common neonatal problems. This is a very worthwhile objective; these issues are often overlooked in standard textbooks. Under the direction of editor Dr. Deborah Campbell, the more than 50 contributors certainly meet their goal. The book is aimed at primary care providers, but active neonatologists also may use this as a reference for the frequent consult in the well-baby nursery. The editor and many of the contributors are well-known authorities in the field. The book has been reviewed by experts in the relevant sections and committees of the American Academy of Pediatrics. The seven sections of the book cover common conditions such as routine care, abnormalities of the physical exam, and common medical conditions such as jaundice, respiratory distress, heart murmur, and metabolic problems. There are a suitable number of tables, illustrations, and fairly high quality pictures and radiographs appropriately placed throughout. I especially appreciated the two unique chapters on postnatal assessment of prenatal sonographic findings and supporting families during perinatal illness and death. Jay P. Goldsmith, MD (Tulane University School of Medicine)

Deborah Campbell, MD, FAAP, is Professor of Clinical Pediatrics and Associate Professor of Clinical Obstetrics & Gynecology and Women's Health at Albert Einstein College of Medicine, Program Director for the fellowship in Neonatal-Perinatal Medicine, and Director of the Division of Neonatology at the Children's Hospital at Montefiore. She conducts the Low birth weight infant Evaluation and Assessment Program (LEAP) and has served various leadership roles at the American Academy of Pediatrics, New York State Association of Regional Perinatal Programs and Networks, NYC Local Early Intervention Coordinating Council, and Greater New York March of Dimes Health Professionals Advisory Board and National March of Dimes. She is a member of the Greater New York Hospital Association Perinatal Safety Collaborative Advisory Group, the National Quality Forum Perinatal Collaborative, and the New York State Perinatal Quality Collaborative Neonatology Expert Workgroup. She also serves on the NYS Palliative Care Education and Training Council, an expert panel that has developed guidance and advice for the New York State Department of Health on best practices in pain management and end-of-life care. She served as a

member on the AAP Taskforce on Implementation of Newborn Hearing Screening and the Early Hearing Detection and Intervention (EHDI) Program. She is currently co-chair of the Bright Futures Guidelines, 4th edition Infancy Expert Panel.
