Pandemic: Quietus: A Post-Apocalyptic Dystopian Fiction Series (The Pandemic Series Book 4)

Best Selling Author of The Blackout Series

BOBBY AKART

Synopsis

Quietus est ... he is quit. There is no such thing as an ending, just a new beginning. Throughout the millennia, extinction has been the norm and survival, the exception. When faced with the hour of departure, will mankind fight to survive? NOT ONLY WAS THERE A PATIENT ZERO, THERE WAS ALSO A LAST PATIENT. A new dystopian, post-apocalyptic fiction series from author Bobby Akart (The Blackout Series, The Boston Brahmin series and the Prepping for Tomorrow series). The events depicted in The Pandemic Series are fictional. They are, however, based upon historical fact.

IN BEGINNINGS, book one of The Pandemic Series, a deadly plague virus has been introduced across the globe by ISIS terrorists who are waging the mother of all wars - The Final Jihad. Dr. Mackenzie Hagan, a disease detective and epidemiologist at the CDC-Atlanta and Nathan Hunter, an off-the-books operative for the mysterious Project Artemis within the Department of Defense, join forces to both identify the disease, but also to locate its source. In THE INNOCENTS, book two of The Pandemic Series, ISIS terrorists continued to wage the Final Jihad, infecting innocent people around the world. The highly contagious form of the plague has been genetically modified - to be the perfect killer. In LEVEL 6, book three of The Pandemic Series, the pandemic has hit a brick wall, but not because it's burned itself out. Rather, it's running out of victims. Social distancing is the only way to avoid a gruesome fate. Unfortunately, in a dystopian world where resources are scarce and scavenging is a way of life, every moment away from where you live could result in your death from either the disease, or your fellow man. QUIETUS concludes The Pandemic Series. For Mac and Hunter, and all mankind, there is no means of avoiding the final death blow brought about by the spread of the deadly plague virus. With every human contact, you run the risk of contracting the disease. Each surface you touch may have been contaminated by someone else. Every animal you encounter, or eat, could be contagious. Rules of survival have changed. Humans must adapt, or die. This is an ingenious, inventive post apocalyptic dystopian thriller series about the threats we face from a global pandemic, and the use of infectious diseases by terrorists as they wage jihad around the world. Drawing on his unique talent to place the reader in a post-apocalyptic world, Bobby Akart delivers an explosive page-turner that has you wondering - will there be a last patient? Note: The Pandemic Series does not contain strong language. It is intended to entertain and inform audiences of all ages, including teen and young adults. Although some scenes depict the realistic threat our nation faces from a worldwide pandemic, and the societal collapse which will result in the aftermath, it does not contain graphic scenes typical of other books in the post-apocalyptic genre. I believe more of our young people need to lead a preparedness lifestyle. Studies show that our millennials do not have

any of the basic survival skills. By writing this series free of vulgarities and gratuitous sexual innuendo, I've intended it to be suitable for everyone.

Thanks. _____ BOOKS IN THE PANDEMIC
SERIES: BEGINNINGS - Available Now THE INNOCENTS - Available Now LEVEL 6 - Available
Now QUIETUS - Available Now _____ SPECIAL
DEDICATION Finally, the Pandemic series is dedicated to the disease detectives, the shoe-leather epidemiologists of the CDC's Epidemic Intelligence Service, who work tirelessly to keep these deadly infectious diseases from killing us all. They are selfless, brave warriors, risking their lives and the loss of their families in order to fight an unseen enemy more powerful than any bomb.

Customer Reviews

This is the fourth and final book in the Pandemic series. I really hate to see this series end, but I hate the end of any really great story. The following may contain spoilers if you haven't read the first three books in the series. If you're just starting the story, I seriously recommend you finish Beginnings, The Innocents, and Level 6 first. If you like post-apocalyptic dystopian fiction, or Prepping for disasters, or even just a really good story, you will love this series. The series began

with a chance meeting of Dr. Mackenzie Hagan, an associate director at the CDC, and Agent Nathan Hunter, a specialist with the Defense Threat Reduction Agency. Their encounter in a village in Guatemala marked the first outbreak of a weaponized pneumonic plague. There were no survivors. It was also the first shot fired by ISIS in the Final Jihad. The plague broke out across the world, seemingly everywhere at once. Mac and Hunter, along with Mac's parents - Barb and Tommy Hagan, and joined by Janie Turnbull, had stockpiled a generous supply of food, weapons and ammunition, and enough medical supplies for Mac and Janie to conduct their search for a cure to the plague. Their remote home in the Rocky Mountains was isolated and defensible, and comfortable. The nearby town of Breckenridge has a small year-round population including a doctor and a small hospital. The plague has claimed the lives of more than 99% of the world population and is slowing only because it has nearly exhausted its living hosts. Now the survivors face survival in a dying world fighting against disease, terrorists and the scum of life, seeking to take advantage of the lack of authority. The Hagans and the people of Breckenridge struggle against a rogue motorcycle gang, a religious zealot seeking to repopulate the world with his own seed, outsiders bringing crime and disease, and government with its own agenda, and armed terrorists. What more could you want? I found this to be the best book of the series! Action! Suspense! The story fairly leapt off the page with excitement, raising my spirits, lighting my soul afire with the love and joy of family, dashing my hopes to the ground and trampling my expectations, gently lifting me and . . . the rest is my imagination. This is a series to entertain and educate, to spawn conversation and study, to take your breath away, and to enjoy reading.

I learned, I cried, I traveled to places I've never been. I experienced love, heartache, anger, fear. My mind was challenged, and my humanity tested by contemplating the choices I would make in similar circumstances. I questioned my own ability to survive. Bobby Akart's works make you FEEL and THINK and GROW. The series is obviously about a pandemic, obviously about survival, obviously about TEOTWAWKI. But it is also about how to LIVE in those circumstances. Lots of intrigue and drama, with lots of teachable moments. Thanks, Bobby.

The reality that this can happen to this country is realistic and believable. Staying current the events the country and world is going through and the fake news media, is very concerning. It's also, understandable how the different groups, American citizens are involved in their own agenda-- racial, neo Nazis, anti establishment, etc. To destroy this country. Don't want to forget the government as well. This book was phenomenal. An eye opener and very real.

I loved this trilogy! It was based in science and didn't get far afield in the story. Having a bit of knowledge of science it is chilling to think of someone could actually produce something like this. I have long been opposed to biological warfare and these books give a believable scenario of what could happen in this. The twists and turns of the government in this book mirrors what is thought of ours. Thrilling and scary.

The final book to Bobby Akart Pandemic is a none stop roller coast from start to finish. He leaves you by the end thinking hard on the whole theme of the pandemic and how vulnerable society as a whole is.

Bobby Akart has done it again. This series drew me in from the beginning. It's a well written story that I can recommend to any age group. Although this book can be read by itself, I strongly urge you to get the full series. Exciting and thought provoking at the same. time Some of the thoughts provoked are rather disturbing. Put this on your must read list NOW! You're welcome.

Another terrific book of the Pandemic series. It may me the end of this series. It has to be the begining of the next. Again Mr Akart again reminds through his characters and their lives to remain ever vigilant and never forget that we are a country of freedoms but we don't have to be unfeeling or stupid. Thanks Bobby for filling my nights.

Another great book in the Pandemic series. Author Bobby Akart keeps you interested in the main characters. Is this series truly over? The characters have made many interesting connections that could easily fill another series of books. There is enough political intrigue, scientific theory and action to keep most anyone interested for hours.
