Customer Reviews

Book by Arizona Master Gardener Press

If you live in Arizona, this is a great reference, resource book. Nicely explains desert plants; you will learn to choose plants wisely in this harsh environment, and how to take care of them. Master Gardeners are an important part of expertise available to the public.

The book has good information on desert gardening, but I was hoping for some photographs of the recommended plants which it does not have. have

a very helpfull book for a new arizona resident knowing very little about living in the desert. It will help prevent mistakes that cost money and time and improve the landscaping of your home at the same time.

Very helpful

Book was not what I expected. Very general information. Not a lot of landscaping help. I would not

recommend this book unless you know nothing about gardening.

Comprehensive manual specifically for desert plantings.

Most of it was basic to any gardening not just Desert. There were a few good tips. Would have liked more advanced info.

The Arizona Master Gardeners are a leathery skinned grizzley bunch of hard scrabble gardeners. They cut the dust by biting into raw barrel cactus like most people would a water mellon. It takes a lot of work to become one, and they put on a lot of shows for the public. This is a great book, but not at \$50. Canada has it for \$14. Germany has it for \$537, which says something about the dollar these days. So by all means get this very practical book and put it to use, just not at those prices. If you want the whole manual, you can get the 920 page 3 ring binder Master Gardener Manual by calling 1-877-763-5315.
