## Customer Reviews

The book is filled with so much useful information. I've just begun to look it over and I love it. My husband and I especially love the section The House and It's Furnishings as we are planning to build a home in the near future. I bought the book mostly because of a particular old recipe, salt rising bread, that is in the back of the book but found the book is full of great reading!

This book is a great resource...I got my free at google books. Same exact book. Free download!
