## Customer Reviews

I wrote a review several days ago and it disappeared so I'm attempting to post this again - This book is a scam. Do not buy it. It's a collection of barely readable low-quality printed screencaps of Mapquest screens. If you could read these maps, you would need to know Arabic to understand it. The last several pages are of blank blue ocean. Doesn't make sense. This book is not helpful or readable. I have requested a refund and sent it back. This item should be removed from sale altogether so others aren't duped.
