Customer Reviews

Christopher Bruhn teaches AP Physics at Summit International Preparatory in Dallas and is an AP Physics consultant for the College Board.

This book looks great. As an AP Physics 2 teacher, it has been difficult to find materials that bridge the gap between problems you find in a textbook, online, or in TIPER resources and the actual AP questions students will see on the exam. This book has excellent questions for students to practice their reasoning skills, and perhaps more importantly, build the writing skills necessary for success

on the AP exam. In addition there are plenty of full AP style questions to build a students test taking skills. The AP style questions are solid. The question explanations give more than just the answers and are complete. Every AP2 Learning Objective appears to be covered. I have caught a few typos but nothing major. I've been looking for something like this. I am going to use these questions with my own students. This is going to save me a lot of lesson planning time!
