Fantasy, for GURPS 4E, offers players and gms the chance to design and run adventures in world of their design. GURPS 4E, being a generic system uses general rule books such as Fantasy to give players outlines on how to create adventurers, creatures, places and loot. Players using Fantasy are not tied to a specific world but can mix and match whatever fantasy worlds they like, think "Once upon a time" from ABC. Players looking for a chance to do something new will be well served by this book. NOTE: You will need the two GURPS 4E core books as well.

Purchased the softcover and it arrived with a neat color cover, but the interior was black and white. This was highly unexpected. Part of the magic that makes 4th edition GURPS rulebooks nice is their consistency and colored chapter page borders. I'll think twice before purchasing a book this way.

One extremely valuable component of this book is the author's attention to the role of magic in game world. He comes back to the subject frequently in the book, which underscores the importance of this one fantasy setting facet.

A nice addition to making gaming easier.

hardcopy version of my pdf, looks almost new.

A bit of everything summarizes this book, where can one build the fantasy setting you want. Currently I am using it with Ultratech in a Cyberpunk campaign.

Great book. I didn't read it yet. But it is a product with a good black and white printing.
